

Plastics
Technologies
in Motion.

FRIMO – Your Service Partner. Everything from a single source!

FRIMO is one of the leading suppliers of manufacturing equipment to produce high-quality plastic components for various applications and industries.

Over the course of more than four decades FRIMO has continuously expanded its product offering and is nowadays a global technology and service partner for the plastic processing industry.

Within the FRIMO organization the site in Freilassing has specialized on the development and manufacturing of tools and machines for the technologies thermoforming, laminating, edgefolding and gluing. In addition, various services are offered by experienced specialists, not only for own tools and machines but also for third-party equipment.
